

To Whom It May Concern:

It is my pleasure to strongly recommend Manwil Bahaa for the position of frontend developer.

I am Hatem Samir, a senior frontend developer at IBM. I have 10 years of experience working web development, and have seen many young professionals come and go.

Manwil is one individual I have worked with who uniquely stands out.

During our time together, Manwil displayed great talents in frontend development using HTML, CSS and latest Javascript frameworks such as Angular. When we first met, I was immediately impressed with Manwil, but during the time we worked together, his understanding of frontend development grew far more than his peers.

It's not just Manwil technical skills that impress me, however. He was a joy to work with because of his amazingly positive attitude and approach to solving problems.

I am absolutely confident that he would be a great fit for your Company. Not only will he bring the kind of skills and experiences you're looking for in an applicant, but he will also quickly become an asset and help your Company grow in any way he can.

Sincerely,
Hatem Samir,
Senior frontend developer at IBM
